Green Building Materials EcoCopper™

Introducing EcoCopper™ Materials

PMX Industries continues our 15 year history of delivering innovative products to the US market with our latest line of green building materials for the commercial and residential markets. EcoCopper materials address concerns of our customers regarding environmentally sustainable copper alloys, volatile commodity prices, weight, ease of fabrication and performance. In addition to their great look and economical value, EcoCopper materials may contribute to earning LEED credits in building projects that specify these materials.

Applications

Those currently familiar with designing and installing copper products may choose our Legendary EcoCopper products.

For interior applications where cost and weight are the primary factors in material selection, while still desiring the look, feel and warmth of a copper alloy, PMX offers EasyFlex EcoCopper.

For applications where durability, increased strength and performance are the primary factors, while still maintaining the look, feel and warmth of copper alloys, PMX offers Rigid EcoCopper.

EcoCopper materials are available in a wide range of colors.

Color	Description
Traditional	Red traditional roofing
Yellow	Yellow brass color
Gold	Similar to 14K gold
Silver	Similar to brushed nickel

The PMX Advantage

PMX is an engineered materials company with a proven track record of delivering solutions that can be tailored to fit your needs including the traditional monolithic EcoCopper and EcoCopper alloys.

Attributes such as color, corrosion, wear behavior, and cleaning methods are combined with our expert understanding of fabrication, forming, drawing, polishing and other manufacturing methods to deliver a complete solution.

Best of all, PMX materials are produced in the US in an environmentally sustainable manner:

- Up to 100% recycled content
- 100% recycled, biodegradable packaging
- Up to 95% renewable energy

We are proud of our results, our materials and our facility. We are equally proud of our talented and committed work force that makes these materials a reality every day.

On behalf of the entire team, we hope to see you at PMX soon.
