

MicroGuard™

Antimicrobial and Fingerprint Resistant Tube and Handrail

There's a new way to fight MRSA and other harmful bacteria* - MicroGuard
Priced competitively with stainless steel, MicroGuard is easy to clean and maintain. This high strength alloy can be used to reduce bacterial contamination* on touch surfaces.

MicroGuard solid metal tubing can be supplied to general contractors for on-site installation, or send us your design drawing for pre-fabricated welded assemblies.

| Standard ICC/NFPA/ANSI/ADAAG sizes | |
|--|---------------------|
| Round | 1", 1.25", 1.5", 2" |
| Square | 1", 1.25", 1.5", 2" |
| Custom Sizes and Shapes: Oval, Embossed, Rectangular | |

Laboratory testing shows that when cleaned regularly, MicroGuard alloy surfaces kill 99.9% of tested bacteria* in less than 2 hours.

Stainless Steel v. MicroGuard
 E.Coli O157:H7 exposure

Laboratory testing has shown that when cleaned regularly:

MicroGuard continuously reduces bacteria* contamination, achieving 99.9% reduction within 2 hours of exposure.

MicroGuard kills greater than 99.9% of Gram-negative and Gram-positive bacteria* within 2 hours of exposure.

MicroGuard delivers continuous and ongoing antibacterial* action, remaining effective in killing greater than 99.9% of bacteria* within 2 hours.

MicroGuard kills greater than 99.9% of bacteria* within two hours and continues to kill 99% of bacteria* even after repeated contaminations.

MicroGuard helps inhibit the buildup and growth of bacteria* within 2 hours of exposure between routine cleaning and sanitizing steps.

* Testing demonstrates effective antibacterial activity against *Staphylococcus aureus*, *Enterobacter aerogenes*, Methicillin-Resistant *Staphylococcus aureus* (MRSA), *Escherichia coli* O157:H7, and *Pseudomonas aeruginosa*.

The use of MicroGuard is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces.

MicroGuard has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination.

 Cedar Rapids, IA 52404

MicroGuard is Green

- High recycled content - up to 100%
- Renewable Energy - up to 95%
- Renewable/biodegradable packaging
- No CFC's, No VOC's, No heavy metals

MicroGuard Green Cleaners - clean and maintain your antimicrobial surfaces with MicroKleen available from PMX
